

STANDARD FORM NO. 64

Office Memorandum • UNITED STATES GOVERNMENT

TO : Chief, FBID

DATE: 21 November 1956

FROM : Liaison Officer

SUBJECT: BBC Stockholm Material

1. For the BBC meeting you requested information on the quantity of Stockholm material now being received in FBID and the time lag from broadcast to publication in the Daily Reports.
2. Quantity. From 1 August through 31 October ten items totaling about five thousand words were received and published in the USSR Daily Report.
3. Time Lag. The time lag from date of broadcast to publication averaged four to five weeks with a maximum of seven and a minimum of two weeks.
4. Quality. The quality of the material, even discounting the time lag, would in my opinion be considered poor in comparison with other Daily Report selection. The editor now automatically published all material received from this source.
